

Manoranjana Kumar

Gen-AI Engineer — Full-Stack Web Developer

Portfolio manoranjank6203@gmail.com LinkedIn

Computer Science engineering student with strong hands-on experience in full-stack web development and Generative AI systems. Proven ability to design, build, and deploy scalable web applications and RAG-based AI solutions using modern frameworks and LLM ecosystems. Passionate about building student-centric platforms, productivity tools, and AI-powered applications with clean architecture and real-world impact.

Projects

FitMind AI — AI-Powered Fitness SaaS Platform (Live)

Tech: Next.js, TypeScript, FastAPI, LangChain, Groq LLM, Firebase

- Built an AI-powered fitness SaaS platform with personalized workout generation and conversational AI coaching.
- Implemented adaptive AI recommendations, workout tracking, streak analytics, and realtime Firebase synchronization.
- Developed a responsive dashboard with AI chat, workout planner, and fitness analytics features.

AI SSC Preparation Platform (Live)

Tech: Next.js, FastAPI, LangChain, HuggingFace, Firebase, Tailwind CSS

- Developed an AI-powered SSC preparation platform with RAG-based doubt solving and intelligent reasoning support.
- Designed a modern responsive UI with authentication, streak system, and AI-driven learning experience.

Medora — AI-Powered Hospital Appointment System (Live)

Tech: React, TypeScript, Firebase, FastAPI, Tailwind CSS, AI Integration

- Developed a full-stack AI-powered hospital management and appointment booking platform for patients and hospitals.
- Implemented dynamic doctor, department, emergency, and appointment management with Firebase integration.
- Added real-time appointment tracking, emergency management, contact support system, and admin-ready healthcare workflows.

Technical Skills

Languages: HTML5, CSS3, JavaScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, Firebase

GenAI / LLM: LangChain, RAG, HuggingFace, Groq API, OpenAI API, Vector Databases (ChromaDB)

Databases: Firebase Firestore, MySQL

Tools & Platforms: Git, GitHub, VS Code, Linux, Vercel

Education

Bachelor of Engineering in Computer Science(7.55 cgpa)

Chandigarh University, India

2022 – 2026

Certifications

- Multi-Core Computer Architecture — NPTEL (IIT Guwahati)
Elite Certification — Jul–Oct 2023
- Internet of Things: Design Concepts and Use Cases — SWAYAM (NITTTR Chandigarh)
Jul–Dec 2024
- Introduction to Blockchain and Ethereum — Infosys Springboard
Issued May 2024
- Blockchain Technology using Ethereum & Polygon — Metacrafters (Chandigarh University)
Summer Program — Jun–Aug 2024
